Serial No.: 10/511,859
Filed: October 18, 2004
Office Action Mailing Date: June 11, 2007

Examiner: FLORES
Group Art Unit: 2611
Attorney Docket: 37476

In the Specification:

Please amend the last full paragraph of Page 2 as follows:

In some embodiments of the invention, the performance analyzer provides information on the modem connection in different ~~physical~~ operation layers and shows cross-references between the different ~~physical~~ layers. Optionally, the performance analyzer provides information on possible connections between data retransmissions or connection retrains and noise effects or other modem acts which caused the retransmissions or retrains.

Please amend the last full paragraph of Page 3 as follows:

Optionally, displaying information on the determined characteristics comprises providing information on noise levels on the connection. Optionally, providing information on noise levels on the connection comprises suggesting possible sources of the noise. Optionally, displaying information on the determined characteristics comprises providing information on effects in upper ~~physical~~ layers caused by the noise levels on the connection.
